# INVITATION TO ATTEND

The World Energy Cities Partnership (WECP) currently represents 16 of the most important petroleum industry hubs in the world. The cities have many issues in common and work smartly together to foster economic benefits and opportunities.

Perth is the only Australian city participating in the WECP, reflecting the strength of the technical and professional expertise that has been developed here in support of the world-class natural resources reserves in Western Australia.

Last year, I was privileged to be elected the President of the World Energy Cities Partnership and it will be the City of Perth's honour to host the civic leaders of the sixteen international cities at the WECP 2010 AGM between 28 - 29 October.

The purpose of the WECP is twofold: to promote the important economic contribution made by the petroleum industry in our respective regions, and; to create economic opportunities and international representation for our local businesses.

In support of these goals, the WECP 2010 AGM will run a conference stream parallel to the civic AGM, with additional business-to-business networking opportunities facilitated by the City of Perth Economic Development Unit.

The Conference theme is 'The Future of the Energy Capitals, Emerging Themes, Global Perspectives and Opportunities'. The Conference program will draw upon the world-class skills and knowledge of the energy industry and tertiary institutions, developed to meet the expectations of a competitive global marketplace.

The civic leaders of participating WECP cities will each be identifying industry leaders from their business communities to accompany them. Based on the delegations from WECP cities that attended Perth for the Australasian Oil and Gas Conference and Exhibition in March, it is expected that the Conference and Business 2 Business opportunities will attract executive-level attendance from leading businesses in exploration, engineering and professional services.

I look forward to welcoming you to Perth!

Ms Lisa Scaffidi**
